- Outdoor children's play area
- CCTV
- Amphitheatre
- Badminton court
- Skating rink
- Walking jogging track
- Senior citizen park
- Landscaped seating areas
- Hopscootch
- Chessed meadows
- Reflexology pathway

Indoor Games Room

Gym

Aerial Night View

Product Superiority

Premium community design

- It has been designed to build a premium community with activity driven open spaces and community social interactions
- Only 3 blocks with separate EWS block and clubhouse
- OSR has been left at the start of the property for converting it into a proper landscape

Community living

Buildings are constructed further inside from the road to avoid disturbance from road.

- The open space is utilized to provide you with beautiful landscape areas
- Entire complex sits on a landscaped podium which has a common pool, clubhouse, amphitheatre and a water body
- The podium is envisaged as a green breathing space that is above ground but visible to many
- An independent clubhouse overlooking the swimming pool provides a beautiful view from the clubhouse

Zero pollution

The buildings are pushed inside not only for privacy but also to cut noise pollution, air pollution and road traffic from the parallel road running along the plot

Senior citizens friendly

During design, we have taken conscious efforts to make the community senior citizens friendly by having all the places accessible by wheel chair and installing seaters in landscaped courtyards, etc.

Vaastu compliant

Conscious efforts have been taken during design phase to have most of the units Vaastu compliant and we have achieved the following:

- Maximum units have SW bedrooms
- Minimum units have north facing headboards
- Minimum units have SW entrance
- Minimum units have NE, SW toilets and kitchen

Central open spaces

- To create a superior product, we have created courtyards. These courtyards have landscaped sitting areas, water body, etc., for various activities
- Apart from these activities, it also provides a lot of green space for the community

Ventilation

- We have given utmost importance to ventilation for all habitable spaces. Every internal and external space is well ventilated, so you get fresh air in all spaces, all the time
- Most of the units have south or west windows / open space (maximum wind direction for past 8 years is along south or west) for fresh air circulation across the apartment

Secure community

Design has been done in such a way that the entry and exit points of the project each have a security room for controlled entry and exit

Master plan and floor plans

- The whole property has 3 blocks majorly, with a common clubhouse equidistant from all
- The major 2 blocks which cater to 10 and 14 apartments per floor have been designed with 4 lifts (3 passenger lifts and 1 service lift) and 2 staircases
- As the entire community sits on a podium, one has to use double height connection between multiple towers through the podiums

No dead space

Internal spaces have been designed with zero dead space

Interior planning

Interior detailing was done for each apartment to achieve the following details, so that the customer will not have any problem furnishing house as per plans shown in brochure:

- Defined wardrobe locations for every unit
- Bed location with side tables
- Electrical layout

No balconies look into each other

No crossover in living

We have tried to design in a way where living room is private without any crossover and we are able to achieve this in most of the units

Kitchen space planning

- Sink with drain board can be shifted to utility, giving more working counter space in kitchen
- Most of the units have a separate living and dining, where dining is combined with the kitchen in order to cater to both spaces easily
- This not only helps in maintaining privacy, but also in keeping the smell out of the living room

Privacy for bedrooms

All the units have bedrooms designed in such a way that it's private and visitors in living do not directly look into bedrooms while sitting in living

Common washbasin and bathroom

- We have provided common washbasin near dining in all the units
- We have also provided a common washroom for the guests in all units for maintaining privacy

Planning for ODU locations

During design phase, we have planned and created spaces for placing ODUs of ACs, so that this area is accessible for service and no ACs will be seen on building façade as it will be hidden within these ODU spaces

Premium common area finishes

Common areas like lobbies will have high end marble, courtyards will be finished with good landscape and hardscape design, amenities and swimming pool will be finished with high end specifications

Well lit and ventilated corridors

All the corridors are well lit and ventilated from either ends and intermediate cutouts, so that there will not be any requirement for lighting corridors during day

Water protected ends for corridors

We have ensured that the corridor ends are closed with windows with glass, so that it does not allow water to come onto the corridors during rains, but allows air when kept open

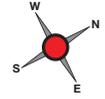

Living Room

Dining

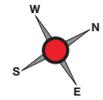

Site stilt floor plan

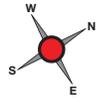

- Legend**
- 1. Fountain / water body
 - 2. Amphitheatre (open sky)
 - 3. Clubhouse
 - 4. Lift lobby
 - 5. Garbage disposal room
 - 6. Drivers' bathroom
 - 7. Electrical room
 - 8. Meter room
 - 9. D.G
 - 10. Transformer yard

Specifications

Structure

- RCC framed structure
- Solid concrete block / light weight block of 200mm for outer wall and 100mm for internal partition wall
- Floor to floor height will be maintained at 2.9m

Wall Finish

- Internal wall in the living, dining, bedrooms, kitchen and lobby will be finished with 2 coats of putty, 1 coat of primer and 2 coats of emulsion
- Ceiling will be finished with 2 coats of putty, 1 coat of primer and 2 coats of emulsion
- Exterior faces of the building will be finished with 1 coat of primer and 2 coats of emulsion paint
- Kitchen, utility and toilets will be finished with 1 coat of primer and 2 coats of OBD
- Bathroom walls will be finished with glazed ceramic tiles up to 7 feet height
- Utility walls will be finished with glazed ceramic tiles up to 4 feet height

Flooring

- Living, dining, bedrooms and kitchen will have 600 x 600mm vitrified tile flooring
- Bathroom, utility and balcony will have 300 x 300mm ceramic tiles with matte finish
- Terrace floor will have grano flooring with threaded grooves
- Common areas and staircase will have tile flooring

Kitchen

- Platform will be done with granite slab 600mm in width, at a height of 800mm from the floor level and will be provided with stainless steel sink with drain board (Nirali or equivalent)
- Dado tiles up to 600mm from granite slab
- Provision for exhaust and water purifier point
- CP fittings will be Hindware / Roca or equivalent

Bathroom

- Polished granite slab with countertop washbasin from Hindware / Roca or equivalent in master bathroom
- Wall mounted washbasin from Hindware / Roca or equivalent in all remaining bathrooms
- Floor mounted W/C with health faucet from Hindware / Roca or equivalent in all bathrooms
- CP and sanitary fittings will be Hindware / Roca or equivalent
- Wall mixer from Hindware / Roca or equivalent will be provided
- Geyser points in master bathroom and provision for the same in other bathrooms

Entrance Door

- Main door will be flush door of 7 feet height with polished finish, with Godrej or equivalent locks, tower bolts, door viewer, safety latch, door stopper, etc.

Bedroom Door

- Skin molded shutter doors of 7 feet height with Godrej or equivalent thumb turn with keys, door stopper, etc.

Bathroom Door

- Skin molded shutter doors of 7 feet height with thumb turn with keys

Window

- Windows will be UPVC sliding panels with see-through plain glass with MS grills wherever applicable
- Balconies with UPVC framed French doors and toughened glass will be provided without grills
- For ventilators, UPVC frame with suitable louvered glass panes and pin headed glass for ODU access

Electrical Fittings

- Cables and wiring will be Finolex or equivalent
- Switches and sockets will be Anchor Roma / Schneider or equivalent
- Split air conditioner points will be provided in master bedroom and provision for the same in other rooms
- Modular plate switches, MCB and ELCB (Earth Leakage Circuit Breaker) system
- Telephone and TV (DTH) points will be provided in living and master bedroom
- USB charging port in living / dining and master bedroom

Others

- STP
- Rain water harvesting
- Generator backup for all apartments (750W for apartments and 500 kW for EWS units), lifts and common area

External Features

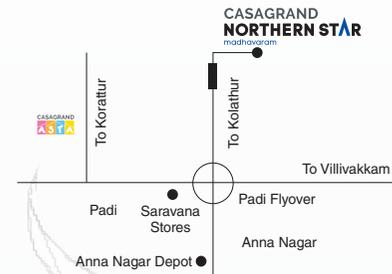

- 8-passenger automatic lift will be provided
- 3-phase power supply will be provided for all apartments
- Suitable landscaping will be done at required areas
- Piped gas line
- Garbage chute

Area - Size may vary by + or - 100 sqft
